

Take Your Brand To The Top

The great thing about hats is that you get a lot of exposure without spending a lot of money. But there are different styles and fits, so you need to know what's right for your brand.

Our ballcaps are available in three profiles – Low, Mid and High.

LOW PROFILE

Ballcap sits close to head and falls well above the ear. This profile is often a good option for smaller heads.

MID PROFILE

Ballcap sits slightly away from front/top of head and falls just above or on tip of ear.

HIGH PROFILE

Ballcap sits away from front/top of head and falls just above or on top of ear.

No matter which type of hat you choose, all our styles are designed for decoration in multiple locations – all the way from the brim to the back.

CROWN SUPPORT:
Refers to the stiffness of the front crown panels.

STRUCTURED
Full buckram reinforcement on the front crown panels.

SEMI-STRUCTURED
Soft backing reinforcement on the front crown panels.

UNSTRUCTURED
No backing on the front crown panels.

BALLCAP CROWN SHAPE:

A-FRAME/FIVE PANEL
Front crown panel is full piece and darted at the top for shaping but does not have the centre front seam. This shape allows for alternate decoration options like heat transfer.

SIX PANEL
The crown is constructed with six panels.

90 DEGREE
The front crown panel has a straight 90° angle from the peak to the crown.

DESIGNED FOR DECORATION

What do we mean when we say “designed for decoration”? A-frame hats that create a flat surface, allowing you to put your logo front and centre with a variety of decoration methods.
